Charging instructions of rechargeable transponders

Charging Instructions :

Place the transponder in the charger

Connect the power of the charger

The transponder's LED will be red indicating that the transponder is charging

Charging time : 3 hours (without memory effect)

The transponder's LED will be green as soon as the charge is complete

When the transponders are in the charger (without power), the transponder is automatic in sleep mode

LED indications :

Outside of the charger, the tricolour transponder's LED indicates the state of the battery (autonomy, charge, power down).

The autonomy is shown by 1 to 4 flashes every 10 seconds :

- 4 green flashes for a 75 to 100% autonomy ($\geq 7,5$ days)
- 3 green flashes for a 50 to 75% autonomy (≥ 5 days)
- 2 green flashes for a 25 to 50% autonomy ($\geq 2,5$ days)
- 1 green flash for a 10 to 25% autonomy (≥ 1 day)
- 1 red flash for a 0 to 10% autonomy (< 24 hours)

The LED turns red when the transponder is in charge and turns green when the charge is complete.

Caution :

Make sure the transponders are DRY and CLEAN before charging
