How install a transponder on a motorcycle

The mounting position of the transponder of a rechargeable or Direct powered transponder is the same. The transponder must be at the same place in all motorcycles.

The transponder should be absolutely vertically, because the transponder is directional and make sure that the transponder has a clear view to the track (without metal or carbon fiber)

The ideal position is behind the plat number.

Fix the holder on the motorcycle
before to fix the transponder
