

PROTIME DECODER

- Resolution at 1/1000e of a second
- 2000 passings memorized

Description

The Protime decoder is used in general by the rental karting tracks. In addition, it can serve as backup with a Protime Elite decoder.

This decoder does not have SD card to store passings but it has a small memory to store up to 2000 passings.

The decoder has a TCP/IP and RS232 interface for the communication with the computer.

Features

Connections :

- 1 loop input
- 1 cell input
- 1 manual input
- 1 audio output
- 1 AUX output
- 1 RS232 output
- 1 TCP/IP output

Specification :

- Clock stability : Oscillator TCXO 0.5 ppm
- Power : 12 VDC via adapter
- Temperature range : -20 à 55 °C (-4 à 131 °F)
- Dimensions : 160 x 100 x 52 mm (6.3 x 3.9 x 2 in)
- Resolution : 0.001 s

Options :

- 1 loop input (pitlane loop)

Detection loop :

- Maximum width of the track (passive loop) : 25 m (82 ft)
- Maximum width of the track (active loop) : 10 m (33 ft)
- Maximum length of the coaxial cable : 100 m (330 ft)

3 years warranty
