

## PROTIME RCS TRANSPONDER

- 4 years of autonomy
- Activated by the loop
- Non motorized sports
- Speed < 120 km/h (75 mph)

### Description

The Prottime R.C.S Transponder is part of the new generation of transponders for non-motorized races. It is particularly recommended for cycling, roller-skating, skiing, running ...

This transponder is delivered with a Lithium-ion battery. With its small dimensions, it can easily be placed on a belt, around the wrist or the leg without embarrassing the competitor.

Only one inductive charge every 4 years at Chronelec is necessary to maintain the transponders in condition.

The information on the level of charge is sent to the decoder when the transponder passes over the loop.

### Features

#### Lithium-ion battery :

- Autonomy : 4 years
- Charging time : 1 time every 4 years at Chronelec by inductive charging

#### Specifications :

- Maximum speed : 120 km/h (75 mph)
- Maximum height of detection : 1.60 m (5.25 ft)
- Temperature range : -20° C à +70° C (-4 à 158 °F)
- Dimensions : 33 x 28 x 11 mm (1.3 x 1.1 x 0.4 in)
- Overall dimensions : 44 x 32 x 11 mm (1.7 x 1.3 x 0.4 in)
- Weight : 18 g (0.63 oz)

### 3 years warranty
